

To Empower the Powerless

Crisis Preparedness & Response

Due to the rise in violent crimes on school campuses all across America, our students are now facing the eminent threat of becoming a victim of a violent school massacre or hostage situation. The time has now come to become proactive for all educators and students as well as members of the community. Don't let your lack of preparedness hinder your response.

Questions that you must ask: Is my school safe? Do we have an open campus? Who has access to our campus? Do we have a locked campus policy in place? Do we have a crisis policy in place? Who is in charge during the crisis? How do I escape and where do I go?

ReLIONce Self Defense has structured a unique safety program called, “**Crisis Preparedness & Response**” (CP&R). CP&R is specifically designed to show students and educators alike, how to identify a potential crisis situation, provide a preparedness guideline outlining safety procedures during the crisis and to provide responsive measures for quick and effective evasive maneuvers.

Program Outline:

- Identify a potential crisis event
- Form crisis teams and identify specific roles for each member
- Develop color coded guidelines for managing natural and man-made crises
- Establish command posts, escape routes, and secondary meeting position
- Assemble first aid kits and other emergency necessities
- Conduct Crisis Preparedness & Response exercises, lockdowns and evacuation plans
- Assess and enhance school crisis communication capabilities
- Enhance coordination with police and fire department and other public safety agencies
